

What can I put in my skip?

Before you place your order, please make sure you know what can be put into your skip and note that this can change depending on what size it is.

Please see some general information below but note that this is a non exhaustive list. If you are in any doubt, please contact us directly for further information. Please also see our Conditions of Sale as there may be an extra charge for disposing of some items.

What Can Go In My Skip?

- **General Waste Skip** - bricks, tiles, concrete, ceramics, soil, clays, hardcore mix, plastics, rubbish, wood, Grass-trimmings, fence-panels, shed components, Soil is suitable for many skip sizes, but the larger size skips that we offer are unsuitable for filling with soil as the skip will be too heavy to lift onto the truck.
- **Inert Waste Skip** - bricks, tiles, concrete, ceramics, soil, clays, subsoil, topsoil. Soil/Inert waste is suitable for many skip sizes, but the larger size skips that we offer are unsuitable for filling with soil and other inert material as the skip will be too heavy to lift back onto the truck.
- **Timber Waste Skip** - Timber/wood material, however contents should not include treated timber, creosoted products and MDF.
